

The Guardian-Founders' Seeding of the Nebadon Universe - Part II: The Cradle of Lyra and the Royal Houses (the Lyran Matrix) Mohsen Paul Sarfarazi, Ph.D.

Abstract

The discussion of the Guardian-Founders' seeding the Nebadon Universe is continued that makes a particular reference to the Cradle of Lyra with the so-called 'Royal Houses of Lyra,' 13D-15D Light Beings who are accredited with seeding the Nebadon Universe through their so-called incarnations in the Nebadon's 4th Harmonic Universe. These are androgenous beings composed of crystalline liquid Light that upon anchoring their consciousness on a form of their congealed energies forming the fabric of the space-times within the 4th Harmonic Universe that serve as a scaffold comprised of matter-antimatter, give them the possibility to have a form of embodiment that acts as silhouette or vibration sheets of Light. And, among these groups were the 13D Emerald Order Elohei who incarnated as the hominid White Felines Elohim angelic beings referred to as the Anuhazi who incarnated through the 12th Stargate in Lyra-Aramatena, as well as the 15D Amethyst Order of Solar Rishi comprised of Cetacean, Avian Pegasus people, and aquatic Bra-ha-Rama who incarnated through the 11th Stargate in Lyra-Aveyon, and the 14D Gold Order Seraph RA Confederacy who seeded the Seraphim Cerez Avian bird people and Aethien Mantis Tall Whites of the Solar Rishi through the 10th Stargate in Lyra-Vega. Note that this constitutes three embodiments that are always used to hold the tone sequence in matter-antimatter as the base, overtone, and resonator, or positive, negative, and neutral components. Accordingly, all this, is consistent with the Cosmic Order of

Trinity that manifests as a Threefold Founder Flame making the Ray Aspect of the Universe. Of course, due to the reptilian negative aliens intruders, these 'forms' hybridized with the reptilians and downgraded to form a variety of hybrid negative aliens races. At the same time, some of the benevolent Founder races had to step down into lower forms such as, for example, the Azurites that were formed from the hybridization of these compassionate Light beings who also created the Interdimensional Association of Free Worlds (IAFW) with its Interdimensional Free World Councils (IFWCs) to deal with the problem of reptilian negative aliens infiltration as well as revering and upholding, the provisions of the Law of One, ensuring that all lost souls stuck in the negative aliens Phantom Timelines of Reality are returned to the God's World, whose right of Free Will and Sovereignty is observed, as well as they are aided through spiritual educational means, etc. to be able to accrete enough higher dimensional frequencies to Ascend to the higher dimensions via acquiring appropriate consciousness expansion and evolution. Although this paper concentrates on such 'seeding' preliminaries in exclusively Lyra, the discourse with regard to the negative aliens hybridization and their nefarious acts of wars and tyranny leading to the Fall of Lyra, etc. are postponed to the companion papers.

Introduction: Lyra

- Lyra is a small but bright northern constellation.
- The name is derived from Latin for lyre or from Greek.
- It is one of 48 constellations listed by the 2nd century astronomer Ptolemy, and is one of the 88 constellations recognized by the International Astronomical Union.
- Beginning at the north, Lyra is bordered by Draco, Hercules, Vulpecula, and Cygnus.

- Lyra is visible from the northern hemisphere from spring through autumn, and nearly overhead, in temperate latitudes, during the summer months.
- From the southern hemisphere, it is visible low in the northern sky during the winter months.
- Three meteor showers seem to radiate from this constellation: the Lyrids, the June Lyrids and the Alpha Lyrids.
- In the past, Lyra was often represented on star maps as a vulture or an eagle carrying a lyre, either enclosed in its wings, or in its beak.
- It was sometimes referred to as Aquila Cadens or Vultur Cadens (falling eagle or falling vulture).
- This historical association is preserved in the name of its brightest star, Vega, which is derived from an Arabic term meaning "swooping eagle".
- Its principal star, Vega at the corner of the Summer Triangle, is one of the brightest stars in the sky.
- Together with Alpha Cyg, Deneb, and Alpha Aql, Altair, Vega forms the Summer Triangle.
- Beta Lyr is a half separated eclipsing binary of a cream-white color.
- With larger telescopes Beta Lyr is resolved as an attractive double star with a blue companion.
- Additionally, two other companions can be seen in small telescopes.
- Another double variable is Delta Lyr.
- With the help of binoculars you can view a blue-white star and a semi-regular red giant.
- An easy object with binoculars or small telescopes is Zeta Lyr.
- One of the most celebrated quadruple stars in the sky is Epsilon Lyr.
- It is commonly known as the Double-Double.
- In a very clear, moonless night it is possible to see the wide pair of stars.
- Each star of this double is a double itself.
- The two stars orbit each other with a period of 62 years.

- The famous Ring Nebula, M 57, is perhaps somewhat disappointing when viewed through amateur telescopes but is poignant on long-exposure photographs.
- In small telescopes it presents itself on dark nights as a ghostly elliptical disk.
- Its apparent size is larger than that of Jupiter.
- The central, very blue star is so faint that it is beyond the power of amateur telescopes to be revealed.
- The nebula can be found half way between Beta Lyr and Gamma Lyr.
- Messier 57 also known as the "Ring Nebula" and NGC 6720, has a diameter of one light-year and is at a distance of 2,000 light-years from Earth.
- It is one of the best known planetary nebulae and the second to be discovered.
- It was discovered in 1779 by Antoine Darquier, 15 years after Charles Messier discovered the Dumbbell Nebula.
- Astronomers have determined that it is between 6,000 and 8,000 years old.
- It is approximately one light-year in diameter.
- The outer part of the nebula appears red in photographs because of emission from ionized hydrogen.
- The middle region is colored green; doubly-ionized oxygen emits greenish-blue light.

Vega

- Fixed star Vega, Alpha Lyrae, is a massive pale sapphire star in the Lyra Constellation.
- The fifth-brightest star of the sky, alpha Lyr, called Vega (Arabic for "stone eagle"), radiates from the top Lyra with a pure white color.
- The traditional name Vega was came from Arabic word wāqi' which also means falling or landing.
- This, in turn, means the 'Falling Eagle.'

- The 'Falling Eagle' or Vega is the principal star in constellation Lyra.
- Vega is the brightest fixed star of the northern sky has a Venus nature with a blend of Neptune and Mercury.
- The Babylonians called Vega the Star of the Queen of Life.
- Vega rules the back of the right knee in the human body.
- This position is associated with 'ego.'
- It creates fulfillment though ego and can be considered as masculine pride brought forward from a former life into this incarnation.
- Vega is one of the 15 Behenian Fixed Stars.
- Its image is a vulture, hen, or a traveler.
- It makes the wearer magnanimous and proud, and gives power over beasts and devils.
- The location of Vega is associated with the alias 10th Lyran Universal Stargate.

Aramatena

- The name Aramatena is the 12th Lyran Universal Stargate and has been used to describe the future Earth blueprint in its crystalline form in the Avatar matrix Universe.
- The Aurora or Ascension Earth is now located in the passage that interfaces between the Milky Way and Andromeda Galaxy, that is connected through the networks of the Polarian Gate hosting system.
- Our planet Earth exists in three main physical formed identities in this Universal Time Matrix.
- 3D Earth is called Earth or Terra.
- 5D Earth is Called Tara.
- 7D Earth is called Gaia.
- Additionally, the name Aramatena also refers to the Avatar Earth in the pre-matter 4th Harmonic Universe.

- Different E.T. Races and extradimensional beings may call these future Earths by different names based on their language (Such as Urantia).
- They are all planet Earth at different stages of evolution in the Timelines.

Creation of Nebadon and the Cradle of Lyra: A Tale of Two Suns

- We are going back into the initial stair step of Creation in the Nebadon Universe.
- And, this surely follows the same trend as any other cosmic level of Creation [1-9].
- But, this one, we experienced in our particular universe, with its consciousness structure [10-13] being formed and following its course of evolution via a 'Time Matrix' [14-17] schedule that is very specific to our location with regard to the spectrum of its speed of time progression [18] (frequencies [19]-Light quotients [20-21]) defining our universal dimensions or 'timelines.'
- The Earth mainstream science puts this back to 13.8 billion years ago.
- And, there may be some ambiguities with regard to accuracy of this that is contingent to method of Radiocarbon dating usually employed.
- Yet, this much it is certain: that is going back billions of years.
- And, this initially occurred in Constellation of Lyra, making Lyra the Cradle of Life [22] in Nebadon Universe [23].
- Furthermore, there are three location in Lyra that were part of a white hole system in which the central Sun of Nebadon Universe brought life to this domain.
- Accordingly, these three locations in Lyra referred to as the Aramatena, Aveyon, and Vega are thought to have been the sites in which a Triad of Stargates as respectively the 12th and 11th and 10th

dimensions connected the Higher Heavens [24] to the 4th Harmonic Universe [25] within Nebadon.

- These were akin to a planetary system that were within a solar system with a central Sun that acted as a White Hole with the caveat that within the 4th Harmonic Universe, the fabric of space-times [26] had not congealed enough to give it a sense of solidity to form particles-antiparticles of matter-antimatter [27-28].
- And, although seeding began in Lyra with the advent of ‘incarnations’ of Light beings of respectively 15th, 14th and 13th dimensional caliber, collectively referred to as the Rishi Suns within the 5th Harmonic Universe, these incarnations did not have embodiments as we could ordinarily visualize within the lower dimensions (particularly the First Harmonic Universe composed of D1-D3 [29]).
- More specifically, these incarnations of whatever form they were (whether Founder Elohei-Elohim Feline-hominid Anuhazi in Aramatena; Avian Pegasus or Cetacean Inyu or Bra-ha-Rama in Aveyon; or the winged Seraphei-Seraphim Avian-hominid Cerez bird people or Aethien Mantis Insectoid Tall Whites Races in Vega), they were (1) first of all, of liquid plasmic Light essence that existed in a form of silhouette or vibrating sheets of Light, and (2) secondly, were genderless or androgenous [30].
- Note that in the 4th Harmonic Universe, any constitutive quanta of energy are not congealed enough (due to their relatively high inherent velocity of quantum spin or frequency-Light quotient) [31] as to form particulates of matter-antimatter as to define the fabric of space-time, nor core manifestation body template for full physical embodiment.
- However, the presence of somewhat congealed constitutive quanta of energy acts as a form of a ‘scaffold’ upon which the free flowing quanta of consciousness energy could be construed as to ‘anchor’ to form the basis for an embodiment or a form.

- Accordingly, such Light Beings appear as silhouettes or sheets of vibrating Light.
- Note that the 5th Harmonic Universe is composed of the Threefold Founder Rays of magenta-violet color in 15D that define the Father Principle, Ray of blue color in 13D that epitomizes the Mother principle, and the gold Ray of 14D that may be described as the Sun of Christos-Sophia, that is attributed to neutral-genderless RA Confederacy.
- And, note that all the Founder Races in the 10th-12th dimensions of Lyra in the 4th Harmonic Universe were composed of all the threefold Founder Rays, and were thus neutral or androgenous in terms of gender or polarity.
- Note that the central Sun of Nebadon is attributed to the RA Lineage.
- This is a that is equivalent to the Light of the Thousand Suns.
- This is a consciousness that, the closest one can come to even understanding this, would be the God Sun and its consciousness.
- Accordingly, the God of Nebadon is attributed to the RA lineage.
- And, some event created an explosion-implosion at that level, at that timeline in Lyra.
- The central Sun in this system exploded and imploded on itself to create two separate suns.
- This is the metaphor of the Light Source undergoing explosion-implosion to create a Trinity form of itself [32].
- This consciousness, this central Sun exploded and became reversed upon it self.
- And, it is not accurate to call it polarized, because it literally created a mirror image or reverse form of itself.
- As it exploded, it went through a black-hole and it reversed on itself.
- When this exploded, this opening created a 'ring of fire' or 'ring nebula.'

- This opening was basically akin to a suction cup, a really long spiral that went in the reverse direction.
- It became the negative of itself as it became 'inside out.'
- And, this happened through an explosion-implosion.
- This was the moment of Creation in the Nebadon Universe.
- Accordingly, in the universe, in terms of its mechanics and structure, a 'Wall in Time' was created as a result of the split that was created from this original event.
- This universe suddenly became special and alive.
- It had a living birth, something that had never happened here before.
- And, this fragmentation and distortion, this explosion and split through inception of the Wall of Time, marks the original seed event.
- This Wall in Time has created some kind of vibrational mass that is similar.
- It has created a split, causing an inability to pass through.
- It is like a slice of some kind of material in this universe (World of Matter) that has a counterpart in its conjugate-mirrored aspect [33-34] (World of antimatter).
- This was before this structure imploded on itself and became separate.
- A central Sun with consciousness exploded and the logo's and sentient consciousness of that being was projected and became a part of this realm.
- The link of all fractal space-times in the original seed marks the spark of Creation of this universe.
- And, the same thing happened to the Earth, in 3D (Terra) and 5D (Tara), as well as 7D (Gaia), as it did in 12D Aramatena.
- It all happened instantaneously.
- Now there were two separate suns.

- There was one sun on one side over here, and another one that appeared as a black-hole on this side that was really now located on the 'other side.'
- And, what appears as a black-hole here now used to be part of the central Sun.
- This was according to a divine plan that the consciousness of the Central Sun fragmented, being experiences in two opposite realms, as if looking at a different side of a coin, with one sun being the inside-out version of the other [35-36].
- And, accordingly, we were later created to eventually 'heal' the split of the two suns should we all permanently join the Zero-Point Field.
- It is akin to the God's consciousness feeding all life via this Great Central Sun.
- This is how this universe began, without polarity, but as two aspects of the same thing, akin to two sides of the same coin.
- And, this represents what the author has always referred to as creating two conjugate space-time systems, giving rise to the Worlds of Matter and Antimatter [37-38].
- The mere concept of polarity does not provide an adequate description for this event.
- It is akin to what the author has always referred to as the Dualism Principle of Creation [39-40] that asserts everything and every event must be created as a conjugate pair with one mirroring the other in terms of time that is the underlying result of Creation and its direction of progression.
- Thus, according to the Principle of Trinity, two suns were created as result of a neutral entity splitting in two, with one epitomizing the mirror image of the other, or so-to-speak the 'inside-out aspect' of the other, giving rise to the advent of Nebadon time.
- And now, as a result of Light projections from these two sources of Suns, contrasting cycles of time are manifested with us as consciousness beings vibrating between the two contrasting Worlds

of Matter and Antimatter that give rise to the quantum aspect of our consciousness vibration [41-44], which is commonly referred to as solar, natural-organic 'Life' [45].

- Thus, something, some potent Sun blew up in Lyra.
- And, whatever that was created from this explosion-implosion on our side in Lyra (Aramatena, Aveyon and Vega) gave rise to a system of Triad portals connecting this universe to the higher Heavens or Superuniverses.
- But, these portals were later destroyed in the time of Lyra during the so-called Lyran Wars by the reptilian negative aliens [46-48].
- First Lyra-Aramatena exploded.
- Then it was followed by destruction of Lyra-Aveyon, and then Lyra-Vega.
- And, as we understand, the same nefarious force caused the Dimensional Counterpart of the 5D Planet Earth (Tara) to also explode.
- In the third dimension, we also see the evidence of this explosion of Tara as the 12 planets in our Solar System.

The Emerald Order Guardian-Founders

- The Trinity of the Emerald Order, Gold Order and Amethyst Order incarnations seeded in the fourth Harmonic Universe in the Lyran Matrix are known as the 'Royal Houses.'
- The first Light manifestation from the God Source field [49], the Threefold Founder Flame or Cosmic Trinity, is the Emerald Order.
- The first Light manifestations of the Emerald Order are the Solar Rishi Order Elohim and Oraphim that direct support to the Guardian Founder Races in the lower Harmonic Universe in light of upholding the Law of One and Principle of Free Will and Sovereignty for all Christos-Sophia human beings in order to attain continued spiritual evolution towards Ascension [50-51].

- These Founder groups involved in this Christos blueprint seeding and ongoing DNA rehabilitation are called the Lyran-Sirian High Councils, which are down stepped emanations of the original Cosmic Trinity of the Milky Way system.

The Anuhazi

- The first lineages of the main original Lyran-Elohim-Feline humanoid Races were called the Anuhazi of the Emerald Order.
- The Emerald Order seeded the Anuhazi Feline Elohim Races and are also known as the founders of the Christos Races, the Yanas, or the Eieyani-Essene Grail lines.
- The Anuhazi embodied as the liquid Light biological forms of the original Christos Races in this Universe in the Solar Logos fields of Lyra-Aramatena.
- These are the Founder emanations that embodied the architecture of the Cosmic Sovereign Law of One, which includes the ancient builder templates of God creator code.
- They are advanced beings from the highest dimensional worlds that appear as tall, luminescent figures with elongated heads and large eyes.
- When they are physically manifest, they reveal the highest refined emerald colors of the Holy Father Arc or Cosmic Monad Principle.
- They will never interfere and must be communicated with, either through previous lineage associations, or their presence requested with full consent and personal intent of SERVICE TO OTHERS as Guardians.
- The Guardian Groups include massive numbers with a great variety of different advanced species.
- The Guardian Alliance is directed by the Elohim Emerald Order Breneau who support the Guardians incarnated on the Earth that are connected to the lineages of the Christos Founder Races.

- And, there are Starseeds [52-53] and Indigos [54] that have incarnated specifically to restore the Emerald Covenant, or reclamation of the Christos.
- The Lyrans further down stepped their consciousness into the next lower density in the third harmonic layers by creating another identity.
- Subsequently, these Race lines were designed to exist within the dimensional layers of the Monadic spirit plane [55-56].
- This Race was created by the Lyrans Founders to specifically oversee the projects of the Lyrans-Sirian genetic seedings occurring on Tara [57], and these particular groups are known as the Elohim.
- Further, the Sirian High Council was organized by and then appointed by the Lyrans to be the main overseers of seeding life on the planet Tara in next lower dimension, the second Harmonic Universe [58].
- Accordingly, the Anuhazi humanoid Feline Elohim Races are also known as the Eieyani Grail lines [59].
- The Anuhazi were the predecessors to our human angelic Race line.
- Thus, they may be regarded as the human elders.
- In fact, the Anuhazi, as the Lyrans Sirian Elders, who are also called Lyrans-Sirian Whites, served as the original Human Prototype.
- The Lyrans-Elohim-Felines were given the task of supervising the Sirians to host the seeding of 12 Strand DNA genetics [60] on the 5D planet Tara for Christos Race embodiment.
- The term Anuhazi also refers to the original first spoken language in our Universe, which is the natural language of the Christos Founders Race.
- It is the original Light language of our ancient ancestors.
- The history of the Anuhazi as the Lyrans Sirian Elders and the original Human Prototype is so ancient and old that so much of the Creation aspect of it is forgotten as to what it is and how it works.

- What is certain that the Elohei, as the First Lineage Emerald Order, seeded the Anuhazi who were the main original Lyran-humanoid Races.
- These include the lineage of the beings that were androgynous and were a part of the Lyran elders.
- The Anuhazi have a liquid Light biological form, who embodied the original Christos Races as the Elohim in this Universe.
- Thus, the Guardian-Founders are ultimately the Founders of the Christos-Sophia Oraphim Angelic Races in this Universe (Nebadon), or the so-called the Eieyani (Yanas) Grail lines.
- Note that it is all about comprehending the human prototype.
- It is not clear as to whether they had any 'conventional' form of embodiment.
- What is clear that life began in the Nebadon Universe at its highest possible consciousness level that is of the Avatar state in the 4th Harmonic Universe.
- Life began when a group individuals of much higher holographic frequential sound-Light quotient consciousness level from higher universes (Higher Heavens) decided to incarnate (and the term is utilized in a 'loose' way) in Nebadon Universe, thus 'initiating' a new universe, or converting an 'uninhabited' to an 'inhabited' universe.
- Thus, these individuals had to congeal a portion of their quanta of Light energy as to retard its quantum spin to be equal and thus resonant in terms of vibrational quality, to be commensurate to a lower level that would be commensurate with what could be classified as a 'new' level as to define the constitutive realm of a new and lower universe.
- Accordingly, these individuals became 'embodied' consciousness beings as what could be described as 'liquid plasmic Light' entities whose consciousness would interface with Nebadon level of matter-antimatter to resemble a form of vibrating sheet or silhouette of Light.

- And, they were androgynous.
- This is what is commonly referred to as an Avatar being who does not possess a solid structure body (flesh and blood) as would appear to us in a conventional sense, but a form of photonic embodiment interfacing with matter-antimatter of highly lower constitutive density.
- They represent a race of people that later incantated as more like shape-shifting silhouettes or sheets of Light.
- Strictly speaking, this does not even constitute a real 'form.'
- However, they represent a timeline referred to as the Lyran timeline in which Lyrans were a part of the creators of the human Race.
- Furthermore, they collaborated with the Seraph-Seraphim.
- And, it all occurred during the so-called Lyran timeline or time cycle.
- In fact, relative to time, it is hard to fathom or make any sense of this.
- In any case, the crux of matter is that it refers to a time cycle during which a great hole or rip in the space-time occurred that is referred to as the 'Ring of Fire' [61].

Interdimensional Free World Councils.

- The aftermath of the destruction caused by the Lyran Wars resulted in an extreme damage to the timeline architecture.
- This constitutes a phase in which the consciousness families had already begun their descent into the lower densities.
- Accordingly, they were gradually being blended with AI signals that caused the corruption of their DNA blueprints.
- Following the destruction of the Star Gate-12 during the Lyran-Elohim Wars, the Emerald Order Breneau and their Elohei-Elohim Feline-hominid Christos Founders Race became the Universal Security Team in our Time Matrix to try to help repair the timeline architecture and eradicate the AI infection through multiple evolutionary rounds.

- Under the direction of the 5th Harmonic Universe's Emerald Order Breneau, the Gold Order Seraphei-Seraphim Breneau and Amethyst Order Bra-ha-Rama Breneau mobilized their Christos Founders Races under the 'Emerald Covenant Co-evolution Agreement' to form the Interdimensional Association of Free Worlds (IAFW).
- Accordingly, the Elohei-Elohim Feline-hominid Anuhazi, the Seraphei-Seraphim Avian-hominid Cerez bird people, Aethien Mantis Tall Whites, and the Bra-ha-Rama, Cetacean Inyu, and the Avian Pegasus Christos Founders Races assembled the massive IAFW organization under the doctrines of the Emerald Covenant, creating a unified collective of intergalactic Guardian Angelic Races from within our 15-Dimensional Time Matrix.
- The purpose of this organization was to protect and embody the Universal Stargate locations in order to repair the negative aliens' AI damage, and to reassemble and protect the Royal House of Lyra's original genetic library which was the source code design for Christos-Sophia forms.
- Thus, the Emerald Order lines are credited as being the Founders of the Interdimensional Free World Councils.
- Examples of IFWC's operation include security measures taken after the Fall of Lyra that also led to the same after the Fall of Tara.
- The association was originally chartered and charged under the title of 'Emerald Covenant' that occurred after the Fall of Lyra, but after the Fall of Tara was referred to as the 'Paliadorian Covenant' [62]
- The Sirian High Council serves as the administrative body for the Interdimensional Free World Councils (IFWC) Task Force to maintain freedom-based evolutionary agreements and agendas between all Star Nations.
- After the Fall of Tara, the Anuhazi down stepped themselves into the lower dimensions through the Azurites to create the 'Interdimensional Free World Councils.'

- This organization was formed in order to ensure that all souls lost in the Phantom Matrix, as the result of the Paliadorian Covenant are eventually recovered and returned back to the God Source.
- Recently, the planet has received changes in appointing more Guardian Defenders and Krystic facilitators from the IFWC at every dimensional level of access.
- They are responsible for the recovery platform, which services the rehabilitation and education towards SERVICE TO OTHERS, and teaches basic Ascension mechanics.
- Cosmic Law is being carried out in this system in several tribunal councils that answer to the IAFW.
- This is conducted through the witnessing of the actual events in DNA records of those with the intention to be involved with others in an illegal activity or wrongdoing such as committing genocide of humanity.
- And, these IAFW governed tribunal councils are now actually being organized upon multiple dimensional planes of reality.
- They were also to carry out the reclamation of the Christos mission and assist the fallen Races infected with AI in order to be able to choose to continue a path of evolution towards rehabilitation and Ascension.

The Azurites

- The origination of the Azurites goes back to the Races that were formed by the RA Confederacy.
- The Emerald Breneau Founders specifically incarnated into the Lyran-Sirian lines that originate from Sirius B, as the blue Azurites Oraphim.
- Three embodiments were always used to hold the tone sequence in matter, base, overtone, resonator, or positive, negative, neutral.
- By combining their genetic templates, the Anuhazi Elohei-Elohim, Cerez and Aethien Seraphei-Seraphim and Inyu and Pegasus Bra-ha-

Rama, Christos Founders Races together created the new genetic race line called the Azurite Eieyani.

- The Christos Founder Races mission includes supporting the pathway of disclosure that leads into planetary liberation and Ascension.
- This includes providing the records for witness testimony on behalf of the Earth and humanity to be freed from their AI alien oppressors, and to gain access into the Interdimensional Free World Council.
- The Lyrans-Elohim-Felines were supervising the Sirians to host the seeding of 12 Strand DNA genetics on the 5D planet Tara for Christos Race embodiment.
- After the Fall of Tara [59], the Anuhazi down stepped themselves into the lower dimensions through the Azurites to serve as the Interdimensional Free World Council.
- Lyrans-Sirian contact expressed that those responsible to guard and protect humanity's genetic records and hidden histories were primarily ambassadors of the Sirian administration councils.
- The Sirian Lodge is a Hall which oversaw the 6D networks which acted as the portal for the Starseeds and the Indigo Races to incarnate on the Earth plane through the Amenti Halls.
- This Lyrans-Sirian administrative body created the Azurite council for the sole purpose of a collective team to support the human embodiment of the Jesus Christ or Yeshua Mission to repair these networks and secure the Amenti field.
- The Azurites were assigned primary responsibility for the carrying out of the Covenant of Paliador which is to recover the lost souls of Tara.
- The Azurite task force was created to also protect, build and guard the Stargates on Earth from 1D-5D.
- When this failed, the inner gates of Amenti were sealed.
- Internal conflicts remained and some former members defected.

The Sirius B Maharaji Lines

- A group of the Oraphim, in particular, those Christos-Sophia Races with Double Diamond Sun templates, were hybridized with the Azurite Races of Sirius B in order to create a special lineage referred to as the “Maharaji.”
- These are the ‘overseers’ who incarnated in waves upon the Earth during the Ascension Cycle.
- The objective was that these hybridized beings would act as the guardian gatekeepers for the portal of the entry of the Indigo lines.
- Some of these branches from Sirius B also went on to Tara and were members of the Azurite Templar teams, protecting the Stargates and performing missions as Guardian Grid keepers.

Blue Ray Founder

- Three Primal Order Sound-Light Fields make up the Ray Aspect of our Universal Creation.
- Blue Ray is of the First Order of Emanation.
- The Blue Ray is a gestalt of four Universal Harmonic Layers of the Universal Families of Blue Ray Consciousness, the Universal Melchizedek Lineages that incarnated as the 12 Essene Tribes or Essenes.
- The Order of the Blue Ray Family emanate from the 13th Circuitry Gate of the Mother of God aspect, which is the first layer projected from the Zero Point Universal God Core.
- This First Order Blue Ray Family are the esoteric 144,000 Genetic Timekeepers of our Universal Time Matrix that was known in the Egyptian and Sirian histories as the Code of The Blue Nile.
- Many Galactic Wars throughout human and non-human extraterrestrial history have been waged for gaining control and access to this code, which holds essentially every genetic key that allows access into the kingdoms of God, or the God’s Worlds.

- The Oraphim used their blue print as a prototype body for to form the 6D Indigo Family of consciousness.
- These are sourced from the Universal Melchizedek Lineages.
- Their blueprint bodies stepped down in frequency as the 3D consciousness human forms as 3D is not able to hold the genetic material of a full Oraphim consciousness.
- These "Unity Field Blue Ray Races" have been recently introduced via 13th gate circuits of Mother Arc reconnected into our planetary grid and its holographic matrix field.
- These have returned to claim this domain as the Natural Domain of God governed by the Law of One or the Law of God.

The Original Blue Ray Holder Order of Melchizedeks

- The vibrational frequency of the Blue Ray level of our Source Field is Melchizedek.
- Thus, Melchizedek actually represents a part of the vibrational pattern of the Source family of Collective Cosmic Consciousness within our Universal Time Matrix.
- Indeed, all humans are directly descended from this Melchizedek genetic pattern.
- When the Patriarchal Melchizedeks digressed, the consciousness energetic field became out of balance.
- However, apart from the Fallen Melchizedeks [69-71], there are other families of the Melchizedeks originating from several layers of trees existing within this lineage.
- One of these beings epitomizes a type of “cosmic crisis management team” specialized in healing and genetic recoding and rescuing the planetary systems that are experiencing genetic digression or possible annihilation.
- Many of these beings are ultra terrestrial that exist in ascended state.
- This means, they are not in an embodied form.

- They are a Light Being with specialized traits and skills as shapeshifting, etc.
- The Melchizedeks' are from the genetic lineage of the builders and the architects adept in creative designs of new structures of holographic projections.
- Accordingly, they know how to correct structural integrity issues in creational systems.
- When there is breakdown of a system i.e. a creation that is digressing instead of evolving since its integrity has been compromised, the Melchizedeks go into these Universal structures and attempt to heal and reweave their genetic instruction sets into new holographic bodies.
- Accordingly, they can work at celestial levels with MerKaBa fields [72] of diverse levels and structures.
- In this sense, they are the 'creator gods' that work with holographic instructional fields.
- They are inter-dimensional and can incarnate into any form body in order to support or assist bringing particular code through their energetic consciousness embodiment.
- As an embodied Melchizedek, they are trained to bring the file instruction set into a planet from the Melchizedek lineage when it is appropriate to do so.
- And, they do so in order for the information, as a consciousness instruction set program, to be relayed into the planetary and the morphogenetic field of that planet.
- When Melchizedek intelligence is woven throughout the species field and is key coded throughout the genetic programs, it allows the entire species to receive that genetic code of intelligence and direct it throughout that consciousness layer.

The Gold Order and the Gold Ray Seraphim Template

- The Gold Order represents the second emanation of the Primal Sound-Light Field or the second individuation of the God-SOURCE in these dimensional fields in the Cosmic Trinity.
- The original Gold Sun DNA is a spiritual powerhouse that opens up to 30 dimensions of consciousness access,
- This includes the Gold Ray order Seraph RA Confederacy who seeded the Seraphim Cerez Avian bird people and Aethien Mantis Tall Whites of the Solar Rishi who incarnated in the fourth harmonic universe on Lyra-Vega through the 10th Universal Stargate.
- The Seraphim Gold Ray Founder Races led by the Solar Christ-Michael gave their bloodline records, their Diamond Sun Genetics, their collective consciousness to help support the Earth, to help reclaim the original 12 strand DNA of the human being that was lost during the Fall of Tara.
- Because of the human Tribal Shield affiliation and genetic relationship to the 10th Stargate and the infiltration of the Golden Eagle Grid, many of the Gold Order have been appointed to directly rehabilitate and transit the Draconian Race lines, and to override their timelines that are related to the negative aliens and their agendas.
- The fallen 10D lines from Vega became the Dragon Moth lines as a result of hybridization made between the Gold Order Seraphim and fallen Draconian lines.
- The Gold Order of the original Seraphim Founder Races are protectors and custodians of the Gold Sun DNA which is the progressive evolutionary DNA template that heals the Fallen Seraphim lines in the entire Universal Time Matrix.
- During the seventh cycle culminating now, the embodiment process was to bring in all of the aspects of the Cosmic Christ consciousness, directly through Christ Michael's incarnation process, and to fully embody the entirety of the Diamond Sun Gold Sun body or Gold Ray

Seraphim Template, in which the entire Fallen Seraphim genetics could be resurrected.

- The result of this massive effort is the physical templating of the Gold Sun DNA for healing the Fallen Seraphim genetics, which form the highest lineage from which the Black Sun groups were formed as Dark Archangels, and descended into digressive race lines in the lowest dimensions.
- The return of the original Gold Sun DNA is a development that is a serious threat to the continued control of the Black Suns on the Earth.
- Although these are difficult and dark times to navigate on the Earth, the restoration of Gold Sun DNA is a major reason for celebration that greatly impacts the Holy Father's Seraphim lineages and all of us on the Christos Mission.

RA Confederacy

- Within the context of holography that gives rise to the 3D Euclidean type physical dimensional structure of the Nebadon Universe, the Gold Ray that makes up one 1 of the 3 constituent parts of the Threefold Founder Flame Rishi Sun Founder Ray Aspect of the 5th Harmonic Universe just outside the domain of this universe, pertinent to the 14th dimensional Stargate, is attributed to the RA Confederacy Guardian group that originate from the Higher 7 Higher Heavens.
- These are a principle component of the Guardian-Founders of the Nebadon Universe that have made commitments to actively participate in fulfilling the Emerald Covenant for revering, upholding, and restoring the Right of Sovereignty and Free Will of all organic solar consciousness beings, including humans as a main component of that, and help them in their course of evolutionary consciousness expansion towards Ascension to higher realms of the 12D universal Time Matrix.

- The communication with the next universe and the RA families and Akhenaton is often achieved through the 14th Gold Ray and 14D portal not in a verbal form but through wave color and code transmission.
- This form of communication is like getting imprinted with a ton of multidimensional language that is carried out with an incredible amount of information in a few seconds.
- This is impossible to fathom and express in terms of our usual linear communication and in words to give it justice and full meaning.
- A part of what is being relayed here is that you hold universal embodied consciousness.
- And, there is a level of healing, of joining, of returning to the point of inception that is referred to as Hieros Gamos or Sacred Marriage [63].
- This is a part of the universal structure that is the healing of RA consciousness.
- This is synonymous with saying that the tone, the sound of vibration of RA is One.
- The RA spirit as one spirit, the Oneness, is a lineage and orientation that is not of this universe.
- It is originated from another Creation, another universal time and space.
- This RA one spirit is a level of consciousness, which co-created this universe.
- And, the one Spirit of RA segmented, exploded and imploded upon itself to create the two suns split, giving rise to the advent of time and a Wall in Time in this universe.
- This Wall in Time is now beginning to merge and heal.
- Also, the relevance of all time and space [64-67] in this universe has to do with all that we are experiencing and going through in these planes of consciousness, so sometime we can get an appreciation of all this.

- And, that time is now.
- It is all about seeing your individual relation to the planetary, solar, galactic, universal, and cosmic consciousness.
- And, your body has, of course, the genetic ability and agreement to heal and merge universal consciousness levels of this rip through the fabric of time, this rip through the Wall in Time.
- The objective is to understand how this system became polarized through a rip through occurring in time.
- This also seems to have gender applicability.
- This is a part of the Dualism Principle of Creation that always forms pairs of opposites.
- And, that interfaces with the subject of polarization and alchemy giving rise to formation of embodiment as we can clearly appreciate.
- What is happening with your particular body right now is the space and time universal levels are merging, giving rise to the healing of the rip in the wall in time.
- And, this is referred to as the 'Ring of Fire.'
- It is an opening that ripped the fabric of the space-time in this universe.
- When this happened, a tremendous amount of consciousness energy became fragmented and became spread out all over, congealing and creating the fabric of space.

The Amethyst Order

- The third Light manifestation of the Amethyst Order are the Violet Ray orders of Solar Rishi comprised of Cetacean, Avian Pegasus people, and aquatic Bra-ha-Rama seeded in the Fourth Harmonic Universe on Lyra-Aveyon through Universal Stargate 11.
- The 11th Stargate in Lyra-Aveyon was one of the 3 most powerful Universal Gates in our system which relates to controlling the operational functions in our time matrix, those that are located in

the Cradle of Lyra (the other two: 12D Aramatena and 10D Vega), along with the 8D Orion Gates.

- The Lyran gates were destroyed during the Lyran Wars, which destroyed the original designed architecture for the Solar Logos Christos-Sophia Body in this Universal system.
- Then, the Black Hole Entities went to Orion in order to secure the 8D Metagalactic Core as a military base and their AI command control center.

11D Fallen Angelic Rehabilitation

- Because of the human Tribal Shield affiliation and genetic relationship to the 11th Stargate and the infiltration by the negative aliens emanating from their Nibiru Electrostatic Transduction Field Technology (NET) Nephilim Reversal Grid (NRG) via the Nibiru Diodic Crystal (NDC) and the reversed 11th Stargate inflicting Checkerboard Mutation causing the so-called “junk genes” [68] in the consciousness field of Earth, many of the Amethyst Order have been appointed to directly rehabilitate and transit the Annunaki Hybrid Fallen Angelics race lines, and to override their timelines that are related to the negative aliens and their agendas.
- The fallen 11D lines from Aveyon-Avalon became the Fallen Seraphim and Fallen Annunaki-Elohim hybrid lines and as a result of the hybridization made with fallen Draconian lines.

Institute of Spiritual Science Inc. Publishing 2020.

This article has been lovingly and painstakingly prepared as a SERVICE to God and humanity and as a benefit to the ALL, and for the sole purpose of spiritually ‘awakening’ the public from their condemnation to ‘unconsciousness enslavement.’

It may be shared or posted freely on websites, Facebook pages, or any public forum.

It is expected that when it is re-blogged or displayed, it is carried out without changing its content, preferably in its entirety, and without any paltering intent, and only if its content is not disseminated for the purpose of personal financial gains or 'service to self only.

Helpful Statement:

For those of you who are not familiar with the work of the author and his contribution in aiding the Ascension movement, Dr. Mohsen Paul Sarfarazi has been engaged in educating the public with regard to the mysteries of Consciousness, Creation and Cosmos, ever since 2011. This effort has also included the consciousness affairs of our Universe as well as on the galactic and planetary levels, and their relevant history, as well as a discussion of the human embodied consciousness and sentient vibration, with the emphasis on human bioenergetics, morphogenetics, genetics, physiognomy, health, psychology, and spirituality, that are the particular subjects of his current interest and emphasis. Dr. Sarfarazi has several groups on the Facebook that are dedicated to specialized aspects of Cosmos, consciousness, and spirituality and human bioenergetics-genetics and physiognomy. He regularly posts tutorial slides in these groups the links to which may be found below. You can look forward to seeing at least several new slides each day as well as links to new papers and essays continuously being published, including certain papers that are expressly written as to respond to particular questions posed and addressed to him. A menu on specific topics with links to his papers may be found on the blog pages on wordpress.com. You can also see the pdf version of some of these papers on academia.edu. To search a topic of interest please google his name or refer to the said menu. May you always be continuously spiritually enlightened and grow in your consciousness.
